

EXEMPLAR CANADIAN FOCUS PORTFOLIO

SEMI-ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

For the period ended June 30, 2018

This semi-annual Management Report of Fund Performance contains financial highlights but does not contain the complete semi-annual financial statements for Exemplar Canadian Focus Portfolio (the "Portfolio"). If you have not received a copy of the semi-annual financial statements with the Management Report of Fund Performance, you may obtain a copy of the semi-annual financial statements, at no cost, by calling 877.327.6048, by writing to us at Arrow Capital Management Inc. (the "Manager" or "Arrow"), 36 Toronto Street, Suite 750, Toronto, Ontario, M5C 2C5 or by visiting our website at www.arrow-capital.com or SEDAR at www.sedar.com.

Security holders may also contact us using one of these methods to request a copy of the Portfolio's semi-annual financial reports, proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure relating to the Portfolio.

Forward-Looking Information

This Management Report of Fund Performance contains forward-looking information and statements relating, but not limited to, anticipated or prospective financial performance and results of operations of the Portfolio. Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. For this purpose, any statements that are contained herein that are not statements of historical fact may be deemed to be forward-looking information. Without limiting the foregoing, the words "believes", "anticipates", "plans", "intends", "will", "should", "expects", "projects", and similar expressions are intended to identify forward-looking information.

Although the Portfolio believes it has a reasonable basis for making the forecasts or projections included in this Management Report of Fund Performance, readers are cautioned not to place undue reliance on such forward-looking information. By its nature, the forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predictions, forecasts and other forward-looking statements will not occur. These factors include, but are not limited to, those associated with the performance of the equity securities market, expectations about interest rates and factors incorporated by reference herein as risk factors.

The above list of important factors affecting forward-looking information is not exhaustive, and reference should be made to the other risks discussed in the Portfolio's filings with Canadian securities regulatory authorities. The forward-looking information is given as of the date of this Management Report of Fund Performance, and the Portfolio undertakes no obligation to publicly update or revise any forward-looking information, whether as a result of new information, future events or otherwise.

Management Discussion on Fund Performance

Investment Objective and Strategies

The investment objective of the Exemplar Canadian Focus Portfolio is to achieve superior capital appreciation over both short and long-term horizons primarily through the selection and management of a concentrated group of long and short positions in Canadian equity securities and equity derivative securities.

The Portfolio invests predominantly in large and mid-capitalization companies. The Portfolio may also invest in bonds and other debt instruments if warranted by financial conditions. The Portfolio does not specialize in any one industry other than to concentrate investments in those industries that offer the best opportunities for exceptional returns at each stage of the economic and market cycle. The Portfolio may also invest in options, including put options or call options either in respect of a specific security or in respect of a stock exchange index as a means to reduce volatility.

The Portfolio engages in short selling of securities which the investment advisor (as defined below) believes are overvalued, especially securities of issuers with deteriorating fundamentals and weak balance sheets. Short positions of index securities such as exchange traded funds may also be employed for capital preservation and hedging purposes. Short positions in total may not exceed 40% of the Net Asset Value of the Portfolio. The Portfolio may hold cash or invest in short-term securities for the purpose of preserving capital and/or maintaining liquidity, based upon the investment advisor's ongoing evaluation of current and anticipated economic and market conditions. The Portfolio may also invest in foreign securities of the same type and characteristics as described above. It is currently expected that the investments in foreign securities will generally be no more than 49% of the Portfolio's assets. The Portfolio may invest in derivatives for hedging and non-hedging purposes as permitted by applicable securities laws. The Portfolio may enter into securities lending, repurchase and reverse repurchase transactions to generate additional income or as a short-term cash management tool.

Investment Risk

The risks of investing in the Portfolio remain as stated in the Portfolio's prospectus dated June 8, 2018.

The Portfolio is suitable for clients seeking medium to long-term growth (through capital appreciation) who have a moderate risk tolerance level.

Results of Operations

For the period ended June 30, 2018, Series F Shares of the Portfolio gained 3.3% (2.9% gain in 2017) while the Canadian benchmark, the S&P/TSX Total Return Index, posted a gain of 1.9% (0.7% gain in 2017) for the same period. Please refer to the Past Performance section for the performance of the other Series. The performance of the other Series offered by the Portfolio differs from Series F largely because of varying levels of expenses charged to each series, as explained in the Management Fee section.

The exceptionally strong sentiment of 2017, driven by synchronized global growth, U.S. tax cuts and strong earnings results bubbled over into the New Year, driving North American markets to record high levels. The initial euphoria exhausted itself by the end of January and markets became more difficult to navigate, as they needed to cope with a series of freshly minted political and economic challenges. Principal among them was the growth deceleration among economies outside of the U.S. and the mounting trade tensions. Fears of tariff disputes escalating into trade wars were particularly worrisome to investors, as they have potential to inflict lasting deleterious consequences on economic prospects for years to come. Investors continued to be concerned that the Federal Open Market Committee's attempt to normalize interest rates might eventually lead to a policy mistake and cause the yield curve to invert - which of course has historically preceded every recession. Strategists exacerbated the confusion. While being in total agreement on the world's ills and their consequences, they nonetheless prescribed widely differing investment solutions. The resulting uncertainty led to bouts of unpredictable sector rotations, leaving North American markets range bound for the remainder of the first half of the year. Despite seemingly endless market gyrations, growth stocks continued their meaningful outperformance. As economic clarity faded with each new tariff proposal, companies able to deliver predictable growth became more valuable. By the end of the second quarter, investors rotated right back to their favorite set of growth stocks without much regard to their lofty valuations.

Prospects for the balance of the year are not rosy. U.S. market performance in midterm election years tends to be significantly poorer than during remaining years of a four-year presidential cycle. Statistically, stock market recovery does not begin until after the election results are known. Prospects for the third quarter are particularly poor, as this period tends

to be cursed with the weakest seasonality of the year. Canadian equity markets are traditionally reliant on foreign capital inflow for superior performance. There has been a distinct lack of evidence of such inflows, recently compounded by NAFTA uncertainty. Canada attracts the most attention during periods of superior economic growth when cyclical industries such as resources perform well. OPEC efforts over the last three years to bring balance into the oil markets have caused oil price volatility, siphoning off funds flow into markets endowed with growth industries with predictable earnings. In deference to these developments I have been eliminating illiquid smaller capitalization stocks from the portfolio, as they tend to become problematic during prolonged market weakness.

Even though trade tensions currently garner a disproportionate amount of media attention because of the potential damage they could inflict on global economic health, investors are mostly counting on an eventual negotiated resolution. However, in the absence of such rational development in a reasonable time frame, markets could start pricing in an economic slowdown. Because the current cycle has been among the longest in history, this economic weakness could evolve into end-of-cycle fears, causing a more pronounced rotation out of economically sensitive stocks into more defensive groups. Timing is always most difficult to predict. I have worked hard to increase the flexibility of the portfolio by eliminating less liquid stocks. One way to accomplish this has been to increase reliance on large capitalization U.S. stocks, which carry the added benefit of increasing exposure to a better diversified, broader economy.

Recent Developments

There are no recent developments for the Portfolio.

Related Party Transactions

As of June 30, 2018, Arrow held 1,613 Series A Shares and 6,926 Series F Shares of the Portfolio, with a market value of \$192,545. This represents 0.2% of the net assets of the Portfolio.

Management Fees

Arrow receives a monthly management fee (the “Management Fee”) subject to HST (and any other applicable sales taxes), calculated as a percentage of the Portfolio’s net asset value and is accrued daily and payable monthly. The Management Fee rate applicable to the Portfolio is 1.65% per annum in respect of Series A Shares, 1.95% per annum in respect of Series L Shares and 0.65% per annum in respect of Series F Shares. Shareholders of Series I Shares of the Portfolio pay a negotiated management fee. For the period ended June 30, 2018 the total Management Fee equaled \$616,225 (\$844,882 in 2017). The management fee is paid in consideration of investment management and administration services. No breakdown of such services was specified in the Management Agreement. A portion of the Management Fee paid by the Portfolio is for trailer fees paid to dealers whose clients hold shares of the Portfolio. The trailer fees are a percentage of the net asset value of the Portfolio, calculated and payable monthly. The table below outlines the Portfolio’s semi-annual Management Fees and trailer fees.

	Series A Shares	Series F Shares	Series L Shares	Series I Shares
Management Fees <i>(Annual Rate %)</i>	1.65%	0.65%	1.95%	Negotiable
Trailer Fees <i>(rate as % of Management Fees)</i>	60.1%	-	35.9%	-

In addition, the Portfolio pays Arrow performance fees (“Performance Fees”) equal to 20% of the amount by which the Portfolio return in a period is in excess of the high water mark (the “High Water Mark”), and no Performance Fee is payable unless a hurdle rate of 6% is achieved in that year. Performance Fees will be payable in all circumstances where the performance of the Portfolio exceeds that of its High Water Mark and its hurdle rate. Please refer to the Portfolio’s long form prospectus dated June 8, 2018, for further details relating to Performance Fees. The High Water Mark set as of January 1, 2018 was \$20.55 for Series A Shares, \$22.14 for Series F Shares and \$14.35 for Series L Shares. For the period ended June 30, 2018, the total Performance Fees equaled \$786,879 (\$126,407 in 2017). Performance Fees are calculated and accrued daily such that, to the extent possible, the share price each day will reflect any Performance Fees payable as at the end of such day. Performance Fees for the Portfolio will be calculated and accrued each day but will only be payable following the end of the fiscal year of the Portfolio based on the actual annual performance of the Portfolio.

The Manager incurs operating expenses on behalf of the Portfolio and charges these expenses to the Portfolio.

Financial Highlights

The following tables show selected key financial information about the Portfolio and are intended to help the reader understand the Portfolio's historical financial performance for the past five years. This information is derived from the Portfolio's financial statements and is represented net of expenses which have been charged to the Portfolio.

SERIES A - NET ASSETS PER SHARE

**Ratios have been annualized.*

1. The net assets per share shown are referenced to net assets attributable to holders of redeemable shares determined in accordance with International Financial Reporting Standards ("IFRS") and are derived from the Portfolio's financial statements. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per share.
2. Distributions, if applicable, were reinvested in additional shares of the Portfolio at the discretion of the underlying shareholders.
3. Management expense ratio is based on total expenses (excluding certain taxes, commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average net asset value during the year. The management expense ratio is calculated in accordance with Part 15 of NI 81-106 and therefore includes performance fees, which were previously reported separately as dollar amounts.

4. The Manager may absorb certain expenses or waive certain fees otherwise payable by the Portfolio. The amount of expenses absorbed or waived (if applicable) is determined annually at the discretion of the Manager and the Manager can terminate the absorption or waiver at any time.
5. The portfolio turnover rate can indicate how actively the investment advisor manages the portfolio of investments. A portfolio turnover rate of 100% is equivalent to the Portfolio buying and selling all of its securities in its portfolio once in the course of the year. The higher the portfolio turnover rate in a year, the greater the trading costs payable by the Portfolio in the year and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Portfolio.
6. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
7. Ratios and supplemental data, where applicable, are computed using the net asset value of the Portfolio.
8. The management expense ratio, management expense ratio before waivers or absorptions and trading expense ratio for the years ended 2016, 2015, 2014 and 2013 have been restated to reflect the reclassification of certain custodial transaction costs related to the purchase and sale of securities.

Past Performance

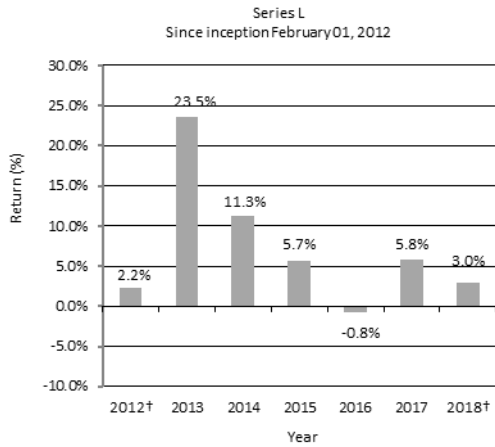

The performance information shown below assumes that all distributions, if any, made by the Portfolio in the periods shown were reinvested in additional shares of the Portfolio. If you hold the Portfolio outside a registered plan, you will be taxed on distributions. Distributions of income the Portfolio earns and capital gains it realizes are taxable in the year received whether received in cash or reinvested in additional shares. No adjustment for potential tax consequences to an investor has been made to the performance information.

The indicated rates of return are historical annual compounded total returns including changes in share value and do not take into account sale, redemption, distribution or other optional charges, that, if applicable, would have reduced returns or performance. An investment in the Portfolio is not guaranteed. Its value changes frequently and how the Portfolio has performed in the past does not necessarily indicate how it will perform in the future.

Year-By-Year Returns

The bar chart below illustrates the Portfolio's annual performance for each of the year(s) shown, and indicates how the Portfolio's performance has changed from year to year. It shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of the financial year.

The chart below illustrates the Portfolio's returns for Series F for the period ended June 30, 2018 and for the years ended December 31 for the Portfolio's shares by long and short holdings:

†Returns shown represent a partial year

Annual Compound Returns (Compound Performance)

The following table shows the annual compound total returns of the Portfolio, and for its benchmark, the S&P/TSX Total Return Index Value ("S&P/TSX TRIV") (a price weighted index of 300 of the largest, most widely-held stocks traded on the Toronto Stock Exchange), for the period ended June 30, 2018. The Relative Performance returns show the performance of the Portfolio as compared to the benchmark S&P/TSX TRIV.

	1 Year	3 Years	5 Years	10 Years	Annualized Since Inception
Series A	6.7%	3.1%	7.9%	8.4%	8.8%
Series F	6.5%	3.6%	8.7%	9.2%	9.6%
Series L	6.6%	2.9%	7.7%	N/A	7.6%
S&P/TSX TRIV	10.4%	7.0%	9.2%	4.2%	4.1%
