

EXEMPLAR TACTICAL CORPORATE BOND FUND SEMI-ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

For the period ended June 30, 2017

This semi-annual Management Report of Fund Performance contains financial highlights but does not contain the complete semi-annual financial statements for Exemplar Tactical Corporate Bond Fund (the "Fund"). If you have not received a copy of the semi-annual financial statements with the Management Report of Fund Performance, you may obtain a copy of the semi-annual financial statements, at no cost, by calling 877.327.6048, by writing to us at Arrow Capital Management Inc. (the "Manager" or "Arrow"), 36 Toronto Street, Suite 750, Toronto, Ontario M5C 2C5 or by visiting our website at www.arrow-capital.com or SEDAR at www.sedar.com.

Security holders may also contact us using one of these methods to request a copy of the Fund's semi-annual financial reports, proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure relating to the Fund.

Forward-Looking Information

This Management Report of Fund Performance contains forward-looking information and statements relating, but not limited to, anticipated or prospective financial performance and results of operations of the Fund. Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. For this purpose, any statements that are contained herein that are not statements of historical fact may be deemed to be forward-looking information. Without limiting the foregoing, the words "believes", "anticipates", "plans", "intends", "will", "should", "expects", "projects", and similar expressions are intended to identify forward-looking information.

Although the Fund believes it has a reasonable basis for making the forecasts or projections included in this Management Report of Fund Performance, readers are cautioned not to place undue reliance on such forward-looking information. By its nature, the forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predictions, forecasts and other forward-looking statements will not occur. These factors include, but are not limited to, those associated with the performance of the equity securities market, expectations about interest rates and factors incorporated by reference herein as risk factors.

The above list of important factors affecting forward-looking information is not exhaustive, and reference should be made to the other risks discussed in the Fund's filings with Canadian securities regulatory authorities. The forward looking information is given as of the date of this Management Report of Fund Performance, and the Fund undertakes no obligation to publicly update or revise any forward-looking information, whether as a result of new information, future events or otherwise.

Management Discussion on Fund Performance

Investment Objective and Strategies

The investment objectives of the Fund are to generate income and capital appreciation by primarily investing in a diversified portfolio of corporate bonds.

To achieve the investment objectives, East Coast Fund Management Inc. ("East Coast"), the investment advisor, will use a flexible, tactical approach to invest in a core portfolio of investment grade, non-investment grade and distressed fixed income securities, issued by Canadian or non-Canadian corporations, trusts and international agencies and governments. The Fund is also permitted to invest in convertible bonds and debentures, loans, preferred shares, exchange traded funds and equities. The Fund will attempt to generate profits and protect against the loss of capital through bottom-up security selection. The portfolio will be constructed through purchasing securities which offer high potential returns without taking proportionate risk. Typically these securities will have underperformed the broader market and will not be viewed as attractive investments by many investors. The Fund seeks to invest in issuers that have good underlying credit quality but that are out of favour and trading at credit spreads considerably wider than historical fair value. The Fund will invest in distressed securities trading well below par and below their recovery value in a default in order to profit from high yields and significant capital gains in either a recovery or a default. The Fund will also invest in shorter term, higher quality investment grade securities on occasion to protect capital while seeking more attractive investment opportunities. As credit markets move in cycles, the Fund will invest counter-cyclically to realize risk-adjusted returns. As such, the amount of credit risk taken in the portfolio of the Fund will be a function of both individual security valuations and the phases of the credit cycle.

The Fund may use warrants and derivatives such as options, forwards, futures and swaps for hedging and non-hedging purposes. Such derivatives may be used to hedge against losses from changes in the prices of the Fund's investments and from exposure to interest rate changes, credit spreads and foreign currencies as well as market risk. Specifically, the Fund will use interest rate swaps and futures to hedge against interest rate changes. Derivatives may also be used to hedge general credit risk and/or obtain exposure to individual securities and markets instead of buying securities directly. If used for non-hedging purposes, the derivatives acquired will be consistent with the investment objectives of the Fund and securities law.

The Fund may also engage in short selling as permitted by securities regulations. Generally speaking, short selling can provide the Fund with opportunities for gains when markets are volatile or declining and also with opportunities to hedge specific risks including interest rate risk. While short selling will be used by the Fund as a complement to its primary investment strategy (discussed above), the investment advisor will utilize the same fundamental analysis in determining whether securities of a particular issuer should be sold short.

Investment Risk

The risk rating of the Fund changed from Low-to-Medium to Low. Please see the "Recent Developments" section below for more information.

This Fund is suitable for investors who are able to accept a low degree of risk and are prepared to invest for the longer term.

Results of Operations

For the six month period ended June 30, 2017, Series F units of the Fund posted a gain of 3.0% (2.9% in 2016) while the FTSE TMX Canada All Corporate Bond Index gained 2.9% for the same period (4.0% in 2016). Please refer to the Past Performance section for the performance of the other Series. The performance of the other Series offered by the Fund differs from Series F largely because of varying levels of expenses charged to each series, as explained in the Management Fee section.

Investment Grade (IG) spreads in Canada narrowed 17bps and have remained resilient in the face of slowing equity markets and rising interest rates. Most of the narrowing occurred in the first month of the year and spreads have traded in a narrow range since mid-February. Because of this we have been able to earn strong returns early and have seen below average

volatility in the Fund's performance. High Yield spreads continued to tighten which came as a surprise as we feel spreads on these bonds don't offer compensation for the risks but investors continued to bid on the high yielding asset class.

Interest rates were the big story in the first half of 2017. In Canada we saw the BoC change their tone on the appropriateness of interest rate hikes and 2-year rates moved up 36bps from the beginning of the year. 10-year rates in Canada were only up 4bps in the first six months ending the first half of the year at 1.76%. However, as recent as June 26th they were trading at 1.46%, with a dramatic 30bps move in the last few days of the month. The U.S. saw almost an exact same flattening of their yield curve with 2-year yields rising only 19bps while their 10-year yields fell 14bps. Although credit spreads are generally uncorrelated with movements in interest rates, a move higher in rates has been positive for investment grade credit spreads.

Oil has fallen 20% YTD which has had a drag on specific names. We have not had exposure to energy producers so we have not felt the impact of lower oil prices on our names. One of our best performing sectors however was Enbridge and TransCanada pipelines, which have long-term contracted revenue streams and are top-notch operators.

Over the last year we have outperformed long-only benchmarks due to security selection as well as our strategy of hedging underlying interest rates. Credit spreads are tighter than they were last year but still offer opportunities for active managers and we are excited about our performance in the first half of 2017 as well as our prospects for the rest of the year.

Recent Developments

On June 29, 2017, the risk rating of the Fund changed from Low-to-Medium to Low. This change is based on the new methodology mandated by the Canadian Securities Administration to determine risk level of mutual funds. Arrow reviews the risk rating for the Fund at a minimum on an annual basis, as well as when there is a material change to the Fund. These changes are the result of an annual review and are not a result of any changes to the investment objective, strategies or management of the Fund.

Related Party Transactions

Exemplar Growth and Income Fund owns 292,150 Series I units of the Fund with a market value of \$2,981,381. This represents 6.4% of the total net assets of the Fund (and 100% of Series I net assets).

As of June 30, 2017, the number of units owned by the Manager of the Fund is summarized as follows:

Fund	Number of units	Amount (\$)	% of net assets attributable to holders of redeemable units
Series F	4,807	45,087	0.1
Series LI	566	5,174	0.0
Series M*	106	1,076	0.0

*US dollar class

Management Fees

Arrow receives a monthly management fee (the "Management Fee"), subject to HST (and any other applicable sales taxes), calculated as a percentage of the Fund's net asset value as of the close of business on each business day. The Management Fee rate applicable to Series A units, Series AI units, Series AN units and Series U units is equal to 1.75% per annum. The Management Fee rate applicable to Series F units, Series FI units, Series FN units and Series G units is equal to 1.0% per annum. The Management Fee rate applicable to Series L units, Series LI units and Series M units is equal to 2.00% per annum. The Fund is also authorized to issue Series I units, for which the Management Fee is negotiable between Arrow and the dealer.

For the period ended June 30, 2017, Management Fees charged to the Fund equaled \$239,267 (\$234,908 in 2016). The Management Fee is paid in consideration of investment management and administration services. No breakdown of such services was specified in the management agreement. From this Management Fee, the Manager pays fees to the investment advisor (East Coast, in its capacity as such) who provides portfolio management services to the Fund. A portion

of the Management Fee paid by the Fund is for trailer fees paid to dealers whose clients hold units of the Fund. The trailer fees are a percentage of the net asset value of the Fund, calculated and payable monthly. The table below outlines the Fund's annual Management Fees and trailer fees.

ANNUAL RATE (%)	Series A, AI, AN, U	Series F, FI, FN, G	Series L, LI, M	Series I
Management Fees (Annual Rate)	1.75%	1.0%	2.0%	Negotiable
Trailer Fees (as a % of Management Fees)	15.4%	-	0.5%	-

The Manager incurs operating expenses on behalf of the Fund and charges these expenses to the Fund. For the period ended June 30, 2017, the Manager has, in its discretion, agreed to absorb \$72,397 of operating expenses associated with the Fund (\$76,658 in 2016).

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help the reader understand the Fund's financial performance. This information is derived from the Fund's financial statements, and is represented net of expenses which have been charged to the Fund.

[†]The Fund was launched on June 27, 2014. Series A and F units began operations on July 28, 2014. Series AI and FI units began operations on September 9, 2014. Series L units began operations on September 29, 2014. Series FN units began operations on December 10, 2014. Series AN units began operations on December 15, 2014. Series I units began operations on March 25, 2015. Series LI units began operations on May 14, 2015. Series U units began operations on October 19, 2015. Series M units began operations on November 10, 2015. Series G units began operations on October 12, 2016.

*Ratios have been annualized.

1. The net assets per unit shown are referenced to net assets attributable to holders of redeemable units determined in accordance with International Financial Reporting Standards ("IFRS") and are derived from the Fund's financial statements. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.
2. Distributions, if any, were reinvested in additional units of the Fund at the discretion of the underlying unitholders.
3. Management expense ratio is based on total expenses (excluding certain taxes, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.
4. The Manager has absorbed certain expenses or waived certain fees otherwise payable by the Fund. The amount of expenses absorbed or waived is determined annually at the discretion of the Manager and the Manager can terminate the absorption or waiver at any time.
5. The Fund's portfolio turnover rate can indicate how actively the investment advisor manages the portfolio of investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of its securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

6. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
7. Ratios and supplemental data, where applicable, are computed using the net asset value of the Fund.

Past Performance

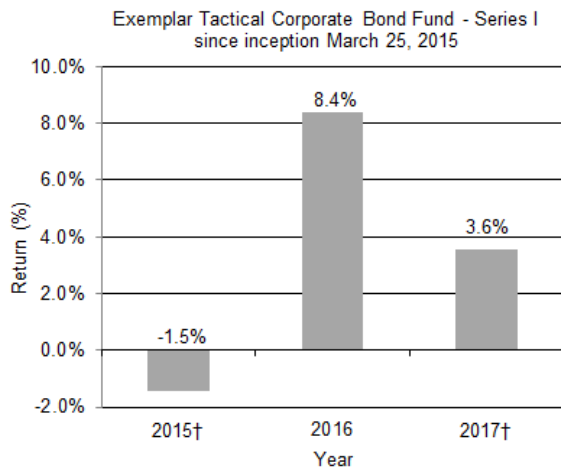

The performance information shown below assumes that all distributions, if any, made by the Fund in the periods shown were reinvested in additional units of the Fund. If you hold the Fund outside a registered plan, you will be taxed on distributions. Distributions of income the Fund earns and capital gains it realizes are taxable in the year received whether received in cash or reinvested in additional units. No adjustment for potential tax consequences to an investor has been made to the performance information.

The indicated rates of return are historical annual compounded total returns including changes in unit value and do not take into account sale, redemption, distribution or other optional charges, that, if applicable, would have reduced returns or performance. An investment in the Fund is not guaranteed. Its value changes frequently and how the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-By-Year Returns

The bar chart below illustrates the Fund's performance for the periods shown. It shows, in percentage terms, how much an investment made on the first day of each financial year (or since inception) would have grown or decreased.

†Returns shown represent a partial year

The chart below illustrates the Fund's returns for Series F for the period ended June 30, 2017 and for the years ended December 31 for the Fund units by long and short holdings:

Annual Compound Returns (Compound Performance)

The following table shows the total returns of the Fund and for its benchmark, the FTSE TMX Canada All Corporate Bond Index, for the periods shown ended June 30, 2017. The Relative Performance returns show the performance of the Fund as compared to the benchmark.

	1 Year	Annualized Since Inception
Series A	6.5%	2.4%
Series AI	6.5%	2.4%
Series AN	6.4%	2.8%
Series F	7.3%	3.2%
Series FI	7.4%	3.2%
Series FN	7.3%	3.5%
Series I	8.5%	4.5%
Series L	6.1%	2.2%
Series LI	6.1%	2.2%
Series G	n/a	5.2%*
Series U	6.9%	4.7%
Series M	9.2%	5.8%
FTSE TMX Canada All Corporate Bond Index	2.6%	3.9%

*Series G units commenced operations on October 12, 2016 therefore the % shown is cumulative from October 12, 2016 to June 30, 2017.

Summary of Investment Portfolio as at June 30, 2017
